Professional Summary

Frontend Developer with 2.5+ years of experience building high-performance web applications using React and Next.js. Improved application performance, reducing load times across core user flows. Scaled a full-stack product to 3,100+ users, delivering seamless UI/UX and real-world impact.

Experience

CashBook

Jul 2025 – Present

Software Engineer

Bangalore, Karnataka

- Developed and maintained key frontend features using **React.js**, improving user experience and application responsiveness.
- Optimized application performance, reducing load times by **25%–35%** and minimizing unnecessary re-renders across core user flows.
- Increased average user session time by **7–8 minutes** while reducing Sentry-reported errors by approximately **30%** through performance optimizations and error handling.
- Worked in an **Agile/Scrum** environment, contributing to sprint planning, code reviews, and continuous delivery of scalable features.
- Integrated **REST APIs** and handled **state management** for seamless data flow across the application.
- Collaborated with **backend and product teams** to deliver scalable features for real-world financial workflows.
- Improved **UI/UX** across critical user flows and pages, enhancing user interaction, onboarding efficiency, and overall engagement.
- Implemented **performance optimization techniques** such as memoization, lazy loading, and code-splitting, improving rendering efficiency across complex UI components.
- Managed edge cases and error states across frontend workflows, improving application reliability and user experience.

Cognitivo

Dec 2023 – Apr 2025

Full Stack Developer

Sydney, Australia (Remote)

- Built and shipped MVP features using **React.js** and **Node.js (MERN stack)**.
- Built responsive, reusable UI components using **MUI** and **Ant Design**, ensuring consistency and improving development efficiency.
- Incorporated **REST APIs** into core application logic across **frontend and backend**.
- Contributed to rapid product iterations, enabling faster feature releases in **early-stage development**.
- Enhanced application scalability by structuring reusable components and optimizing API interactions, enabling smoother feature expansion during early-stage growth.
- Implemented **pagination and data handling optimizations** to efficiently manage large datasets across frontend and backend during early-stage development.
- Improved code maintainability by structuring reusable components and following modular design practices, reducing duplication across the codebase.
- Collaborated closely with designers to translate requirements into functional UI, ensuring alignment with business goals.

Projects

BeatStore - Music Licensing Marketplace | Next.js, Tailwind CSS, shadcn/ui, Nx Monorepo, Zustand, MongoDB

- Built and scaled a full-stack platform using **Next.js** (frontend & backend), **MongoDB**, **Zustand**, and **Nx monorepo**.
- Acquired **3,100+ users** with **50–60 daily active users**, validating product-market demand.
- Integrated **payment systems**, **subscriptions**, and **commission-based monetization**, including international payments (**USD/INR**).
- Applied **SEO strategies** (metadata, structured data) to drive organic traffic and improve discoverability.
- Achieved **16.3K clicks** and **347K impressions** in 12 months, with **4.7% CTR** and **average position 13.9**.
- Built **high-performance, scalable UI systems** with a focus on user experience.

- Refined application performance and user flows, reducing load times and improving user retention.
- Created core features including **authentication**, **track uploads**, **licensing**, and **marketplace functionality**.
- Built dedicated **Buyer, Seller, and Admin panels** for platform management, content uploads, and user interactions.

Cosovo - Steel Storage Container Marketplace | *Next.js, MongoDB, Tailwind CSS, Vercel*

- Built and deployed a full-stack web platform, **Cosovo.in**, developing both **frontend and backend** from scratch.
- Designed a scalable backend architecture with **REST APIs**, handling core business logic and data flow efficiently.
- Developed a responsive and user-friendly **frontend interface**, ensuring seamless user experience across devices.
- Built dedicated **Admin and Buyer panels** to manage platform operations, user interactions, & content workflows.
- Established **authentication and authorization** systems to ensure secure access and role-based functionality.
- Optimized application performance and API efficiency, improving overall system responsiveness and reliability.

Education

BN University

Bachelor of Computer Applications (BCA), 78%

2019 – 2022

Udaipur, Rajasthan
